Madam, Sir
Head of Human Resources
GOMYCODE

Dear Madam or Sir,

My name is Haithem a student of GOMYCODE hackerspace Gabes. A motivated student who participated to all workshop with enthusiasm and I have completed the one to one meeting with an average 97%.

I am applying for this job because it fits with my goals and I find the nice member's at GOMYCODE in deed I find myself comfortable. During the learning program, I have achieved a lot of goals and challenges, it was hard at the beginning but with a lot of effort, hardworking and researches, and at the end I made it and developed my application in time.

For me, there is no meaning for the word: "failure"!!! It is an opportunity to work more on myself and to get help from the other member via contacting them, ask their help to interact with them. It's hard in the beginning to break the ice but after gone well and I have made a new friend and professional friendships.

Could we schedule an appointment next week to discuss how could I contribute to the development program and help your company to find optimal solutions to its current business needs?

Best regards,

Haithem
